

A CLEARER VISION FOR THE PERFECT FINISH

Europa EL

fully automated B2 laminator

The Europa EL is a fully automatic laminator with an in-line embossing station for sheets up to B2 size.

Based on the award winning Europa the EL is ideal for today's print-on-demand market. Its features make it equally adept at running both digital and lithographic output.

The suction feeder offers a deep pile for longer run work and is easily adjustable for a variety of different sheet sizes.

An infeed roller presents lightweight and digital output to the laminating and nip rollers where a no sheet detector helps to prevent unwanted wraparounds.

The centralised control panel offers ease of operation.

The madrel has a hinged support and film can be adjusted laterally on the run to minimise waste and down time.

A decurl bar, which may be altered on the run, is fitted to assist in giving a flat result.

The positioning of the perforator overcomes any potential issues caused by poor film roll profiles and allows higher speeds to be maintained.

The adjustable burster automatically separates sheets. A cushion of air supports the sheet as it is delivered into the catch tray.

The catch tray may be adjusted to suit various sheet sizes.
