

A CLEARER VISION FOR THE PERFECT FINISH

stackers

modular stacking systems

D&K Stackers are manufactured in sizes up to B2 and B1 to fit a range of single and two-sided laminators.

D&K Stackers are modular in construction and may be added to your existing laminator in place of a standard Jogger table.

The infeed table is pneumatically lifted and lowered to allow good access for webbing and for maintenance to the rear of the laminator.

Paddles align the sheets in the stacker:

Sheet size changes are easily accommodated as two rear paddles and sheet stops may be moved in one operation using the wheel on the operator's side of the stacker.

The stacker table lowers all the way to the floor for easy removal of the pallet.
